Insect Management - New England Vegetable Guide A successful insect management program can best be accomplished by combining IPM techniques, such as accurate pest identification, scouting, monitoring and action thresholds, with biological and alternative (preventative) control practices and selective insecticide applications if needed. Chapter VI: Insect Management | Vegetable Resources Common Insects Attacking Vegetable Crops Soil Insects Wireworm. Plants Attacked: Corn, small grains, grasses, potatoes and other root crops such as sweet potatoes. Description: Adults are usually hard shelled, brownish gray or nearly black, somewhat elongated with the body tapering toward each end. The larvae usually are hard, dark brown, smooth, wire like worms from 1/2 to 1 1/2 inches long when grown. Vegetable Insect Management in Georgia - UNIVERSITY OF GEORGIA The vegetable industry in Georgia represents a \$0.8-0.9 billion farm gate value each year. Losses due to insect pest damage or control costs can reach 5% or more for many of the vegetable commodities. Integrated pest management of key insect pests is critical to managing these risks in vegetable crops.
